- **PROBLEM STATEMENT** - Gives reference about the graduates who are working in various companies belongs to a particular college

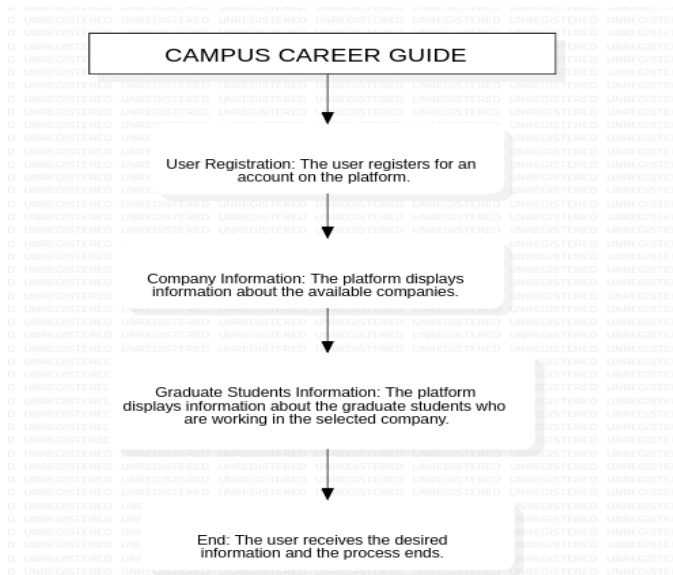

ABOUT THE PROJECT

- Our project aims to develop a platform that fosters mentorship and communication between undergraduate students and graduates who are currently employed. This platform provides a space for undergraduate students to seek guidance, advice, and insights from graduates who have successfully navigated the transition from academia to the job market. Through user registration, matching algorithms, students can connect with mentors who share similar interests or career aspirations. The platform encourages profile creation, resource sharing for more personalized support. Ultimately, our project seeks to empower students by facilitating valuable interactions with experienced graduates who belongs to a particular college, helping them make informed decisions about their education and career paths.

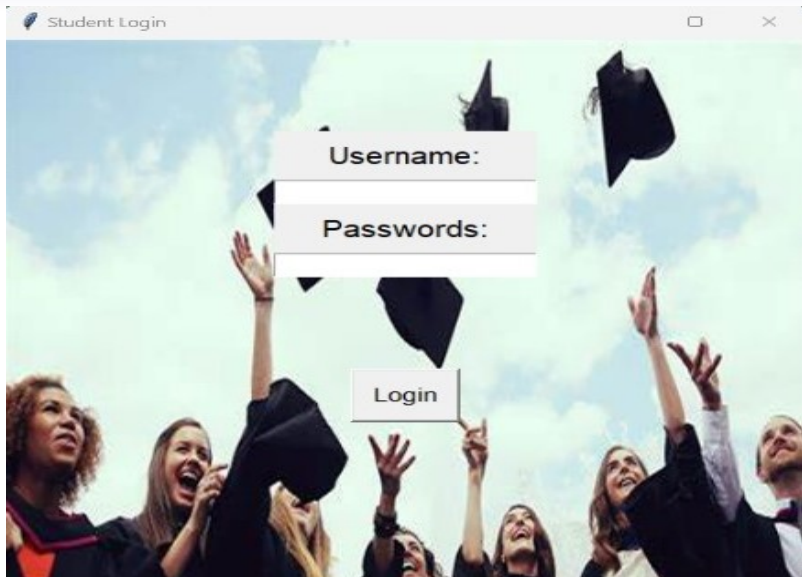

WORKING

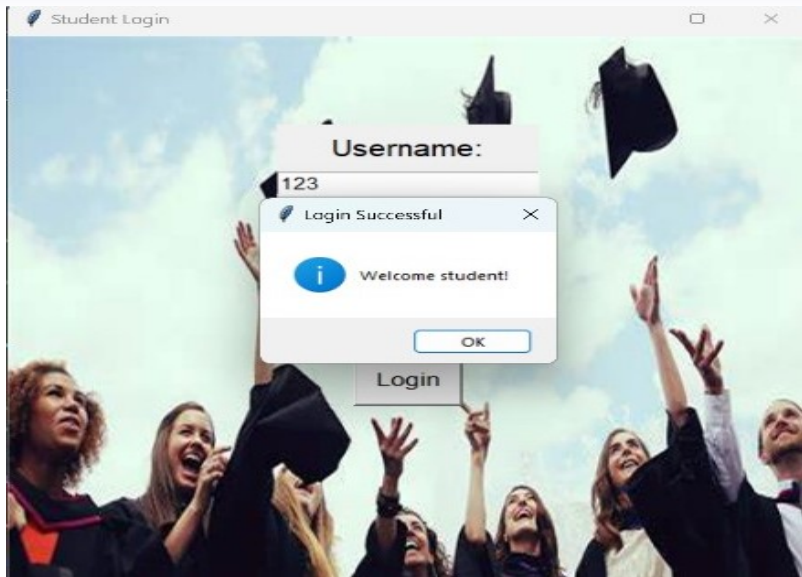

- An undergraduate students who are seeking for the career guidance and reference get login to this app with their user id. Then after the conformation of login then it will taken into the next page which contains the various companies list so that the user can choose the company from which she want the information After choosing a particular company, it will get displays the graduate students details who are working in a particular company. In that page there is an information about the graduated students like-their name, mobile number, company and the position they hold in that company. Overall, this app serves as a supportive community where students can seek mentorship and guidance from graduates who have successfully transitioned into the workforce. It empowers students to make informed decisions about their education an career paths by connecting them with experienced mentors.

- Integration of Mentorship and Guidance

TECHNOLOGIES

- **Python**
- **Chatgpt**
- **Blackbox**
- **Sqlite3**

CONCLUSION

- In conclusion, the described app serves as a valuable platform for undergraduate students seeking career guidance and mentorship. By providing a user-friendly interface with login functionalities, the app ensures a secure and personalized experience for each user. The inclusion of a comprehensive list of companies allows students to explore various career options and make informed decisions about their future. Ultimately, the app contributes to empowering students in making informed choices about their education and career trajectories. It bridges the gap between academia and the professional world, creating a supportive environment for mentorship and knowledge exchange. As students embark on their journey into the workforce, this platform becomes a valuable resource for networking, learning, and gaining practical insights from those who have already achieved success in their respective fields.
